SEPTEMBER 16, 2026

1. XLOOKUP overview and use cases

XLOOKUP: search range, return matching value

- 1. XLOOKUP: modern way to find data
- 2. XLOOKUP: for customer/product/employee/order lookups

2. XLOOKUP conceptual flow

- 1 Find lookup_value
- 2 Match in lookup_array
- 3 Return from return_array

- 1. XLOOKUP = Find → Match → Return

3. XLOOKUP syntax and arguments

=XLOOKUP(lookup_value,lookup_array,return_array,[if_not_found])
Basic XLOOKUP syntax

lookup_value: value to find

lookup_array: range containing lookup values

return_array: range to return from

[if_not_found]: optional fallback result

4. Core XLOOKUP behaviors

- 1. XLOOKUP finds value in lookup range
- 2. XLOOKUP returns corresponding value
- 3. XLOOKUP can look left or right
- 4. XLOOKUP exact match by default

5. Simple customer XLOOKUP example

- 1. A2 contains Customer ID 1005
- 5. Simple customer XLOOKUP example (contd.)

- 2. Customer IDs A2:A100; names B2:B100
- 3. If E2=1005, result Abu Nousher

=XLOOKUP(E2,A2:A100,B2:B100,NotFound)
Lookup customer name from ID

6. Real-world customer data table

Customer ID	Name / City	Status
1001	Rahim Dhaka	Active
1005	Abu Nousher Khulna	Active
1010	Karim Rajshahi	Inactive

7. Real-world XLOOKUP formula

=XLOOKUP(G2,A2:A4,B2:B4,NotFound)
Lookup name from 3-row table

- 1. G2 contains lookup Customer ID
- 2. Formula returns Abu Nousher when ID=1005

8. XLOOKUP vs VLOOKUP feature comparison

Feature	XLOOKUP	VLOOKUP
Lookup direction	Left or right	Mainly right
Exact match	Default	Must specify
Not found handling	Can define result	Often needs IFERROR

9. [if_not_found] argument and pro tip

=XLOOKUP(A2,B:B,C:C,NotFound)
Use [if_not_found] to avoid #N/A

- 1. [if_not_found] argument sets fallback result
- 2. String "Not Found" shown when no match

10. XLOOKUP error handling decisions

MUST REMEMBER

- 1. Incorrect: Leaving [if_not_found] blank shows #N/A
Correct: Set [if_not_found] to fallback like "Not Found"

Lookup value found in array?

Yes	No
Return matching value from return_array	Return [if_not_found] result or #N/A

11. XLOOKUP cheat sheet mnemonic

- 1 XLOOKUP: Find a value
- 2 Search lookup_array
- 3 Return matching value
- 4 Use fallback when not found

- 1. Remember: =XLOOKUP(find,search,return,fallback)

12. Data workflow context
