

EXCEL PIE CHART

Show part-to-whole relationships

04

WHEN TO USE

- Data has **2-5 categories** that add up to a **100% total**.
- Answers: **What share does each part contribute?**
- Use it for a **simple share message** when exact comparison is not needed.

BUSINESS QUESTION

- What share of revenue does each product bring?
- Which product contributes the most to revenue?
- Do two products make up most of the total?

DATA EXAMPLE

	A	B
1	Product	Revenue
2	Laptop	120,000
3	Monitor	85,000
4	Keyboard	45,000
5	Mouse	30,000

DATA ANALYST USE CASE

Example: **Revenue Share**

QUESTION

How is revenue split across products?

CHART

Pie Chart

INSIGHT

Laptops and Monitors together bring in about 73% of total revenue.

1 Revenue Share by Product

3 Laptop Monitor Keyboard Mouse

1 Chart Title 2 Data Labels (%) 3 Legend = Categories

HOW TO CREATE IT IN EXCEL

Select Data

Insert

Pie Chart

Add Title

Format

Analyze

- Select the data, including the headers (A1:B5).
- Go to the **Insert** tab and open the **Charts** group.
- Click **Insert Pie or Doughnut Chart > 2-D Pie > Pie**.
- Add a clear **Chart Title** that states what the 100% represents.
- Format:** add Data Labels showing **Percentage**, order slices largest first, keep the legend.

DO / DON'T

DO ✓

- ✓ Limit the chart to 5 slices or fewer
- ✓ Show percentages as data labels
- ✓ Order slices from largest to smallest
- ✓ Make sure the parts add up to 100%

DON'T ✗

- ✗ Use it for many categories
- ✗ Compare slices of similar size
- ✗ Use it to show trends over time
- ✗ Explode slices or use 3-D

DATA ANALYST TIP

Use it only when showing a simple part-to-whole relationship.

If the slices look alike in size, switch to a bar chart so differences are visible.
